

LASIK: Questions to Ask Your Doctor

Along with any questions you may have, bring this list to your initial consultation and take notes. Rely on your common sense and ask for proof when in doubt.¹

- How long have you been performing LASIK procedures?
- What results can someone with my vision problem realistically expect from LASIK?
- What percentage of your patients achieve 20/40 results or better?
- What percentage of your patients achieve 20/20 or better?
- How many patients report unresolved complications 6 months after the surgery?
- If enhancement surgery is required, what will you charge?
- Do my occupation and hobbies affect my candidacy?
- Does my medical history have any bearing on my candidacy?
- How often and when will you perform postoperative examinations?
